

OSA Student Chapter Kickoff Dinner and Lecture

Guest Speaker: Dr. Madeleine Glick
Senior Scientist at APIC Corporation

About OSA at Caltech

The Optical Society of America Student Chapter is being started up at Caltech. We aim to increase discussion of optics amongst students, bring in speakers from industry and academia, do outreach, and have fun with light. We are recruiting new members and leadership. If you have ideas for events, please bring them. We will be serving dinner and will be having a guest speaker.

Optical Interconnects for High Performance Computing

Enormous bandwidth demands are being placed on data centers by new applications along with the urgent need to meet these demands at much improved energy efficiency. At the same time many academic and industrial research groups are working towards designing and building exascale computing systems. This talk will review approaches to solving these challenges using optical technology.

Wednesday, March 5th, 2014

Lecture Starts at 7:00 pm – Steele 125

Dinner and Refreshments at 6:30 pm

A^{Ph} & MS

Electrical Engineering
